The building housing CHELSEA MOON The Resort is an extremely valuable structure combining a 100-year-old Japanese traditional form with a Western mode. In former years, the building had been used by foreign embassy officials and diplomats. At the entrance to the site, a large cherry tree represents Japan. The resort salon, surrounded by rich-green Japanese gardens and a pond, is so relaxing that it is hard to believe it's in the city center of Tokyo.

Special plan

Kabuki

Traditional performing art passed down from the Edo period

Kabuki, a world intangible cultural heritage, was created 400 years ago, around the same time that Shakespeare was born in England and opera was established in Italy. Kabuki started in the Edo period and immediately became fanatically popular among citizens. "Ka" in Kabuki means music, "bu" and "ki" mean acting performance. Kabuki was a contemporary style of drama in the Edo period, whose audience was made up of common people irrespective of age or gender. As such, Kabuki incorporated modern manners and customs of the day so that it could be understood easily by anyone.

This plan shows and explains the steps a Kabuki actor goes through to be ready for performance, including make-up and costuming. Afterwards, the Kabuki actors perform a Kabuki dance.

Entertainment plan

Ninja

Physically experience the spirit of shinobi (the art of the ninja), a Japanese cultural asset, and an authentic ninja of modern times!

The ninja still enjoys enormous popularity in Japanese historical culture. We have prepared a ninja experience for guests. The ninja has played an active role in the backstage of history. These are the people who have taken on shadow jobs such as information gathering and espionage, using every kind of technique.

Most ninja schools disappeared due to the stable conditions of the Tokugawa Shogunate, and their knowledge and martial arts have been passed down by only a few schools.

Under the instruction of the 18th head of the Musashi clan, our ninja experience plan displays traditional martial arts handed down from their ancestors, arts which were never previously allowed to be revealed outside the family. The ninjas will entertain you with such ninja techniques as shuriken (knife) throwing, blowgun blowing, meditation and Kuji-kiri (self-defense incantation), under the motto: Treasure every encounter, for it will never recur.

Musashi clan
Musashi clan's ancestors belonged to the Shibata clan as their Iga-school ninjas. After the Shibata clan was defeated in the battle of Shizugatake in 1583, Ieyasu Tokugawa (the first Shogun of the Edo government) took them in as his ninjas because they were from Mikawa, the home territory of the Tokugawa clan. They served in the government of Edo for 265 years. In 2010, after the 50th anniversary marking the death of the clan's 16th head, the 18th head and the master ninja of their clan opened a small dojo (training hall) in Tabata, Tokyo and continue to play active roles as contemporary ninjas.
